IK09 – IMPACT RESISTANCE FOR GREATER SECURITY AND PEACE OF MIND

All of the functions of the standard MTM version are available in the vandal-resistant version. It uses the same mechanics, modular functionality, and accessories but with a vandal-resistant skin that includes crush proof buttons and custom screws.

Designed in Zamak composite, all VR items will resist up to IK09 impact levels. This means the MTM series is the most complete range of modular entry panels on the market offering you durability, without compromising the features and quality of a standard MTM.

MTM CAMERA MODULE

FEATURES

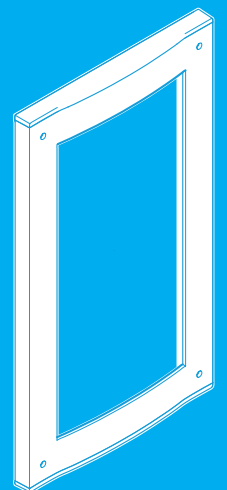

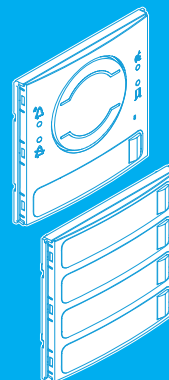

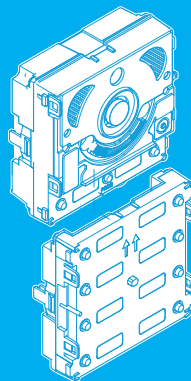

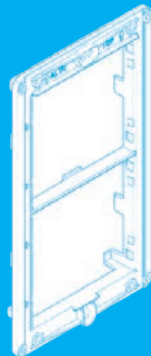

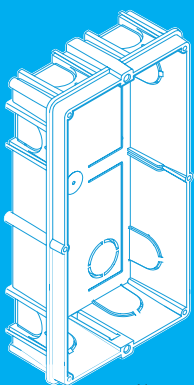

- 2 call buttons
- 2 on-board controls: electric lock and auxiliary control (1A, 30V max)
- "Wide-eye" lens, aperture 100° horizontally and 82° vertically
- High efficiency illuminator (adjustable brightness) with anti-glare diffuser
- LED pictograms for status alerts: door opening, active communication, call in progress and system busy
- Adjustable speaker, microphone and electric lock
- Dual blue or white backlit name tags with brightness settings
- IP54 water and dust protection rating
- MiniUSB front panel for firmware updating and programming.

EASY INSTALLATION

The external unit consists of five components: the wall or recessed box, the frame, the electronic module, the front panels and the external frame.

RECESS MOUNTING BOX

Available for the various entry panel versions, from 1 to 4 modules, depth 48mm.

**SNAP
TOGETHER
COMPONENTS
NO TOOLS
REQUIRED!***

FRAME

Aluminum module-housing profile with cathoporesis treatment and black paint coat to ensure high levels of endurance against corrosion and rust. Compatible with BTicino, Comelit and Urmet flush mounting boxes.

ELECTRONIC MODULES

Snap-in installation with no screw needed. Simple wiring among the modules. No chance of error thanks to the polarized connectors.

FRONT PANELS

Front panels ready for use, as they are pre-configured and need no additional buttons or caps. Outer side made of satin-finish aluminum with sturdy internal structure to make the standard outer panel IK07.

OUTER FRAME

The closing frame is sleek and essential, entirely made of satin-finished aluminum.

RAIN HOOD

A surface mounting box is available if flush mounting is unavailable.

*Security screwdriver (supplied) required to fasten outer frame in place.

XTS 7" VIDEO MONITOR

XTS FEATURES

WiFi VIDEO CALLING

CAME BPT's state of the art XTS monitors have WiFi cards built-in which allow the device to be connected directly to your LAN/WAN

This simple set up lets users activate the powerful video calling feature so you can use your smart devices to see who is calling your entry panel wherever you are in the world!

VIDEO ENTRY APP

For smartphones and tablets

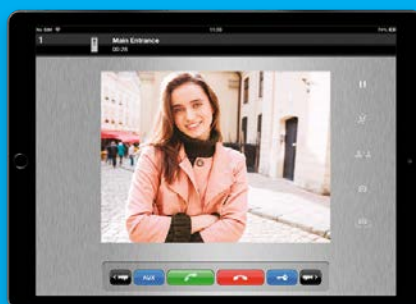

See who's ringing the intercom even when you're not home. Available from the Apple App Store and Google Play Store.

XTS APP CONNECTIVITY

Video entry kits with WiFi calling support 4 simultaneous app connections per call. Each XTS X1 WiFi monitor is supplied with 4 app licenses included.

APP
CONNECTIVITY
ON UP TO
4 MOBILE
DEVICES

STATE OF THE ART BONDED GLASS

Inspired by the desire to produce the highest quality video entry product available, XTS incorporates the latest cutting edge video touch screen technology, boasting a high quality resolution of 1024 x 600 pixels.

The optical bonding process increases strength whilst reducing ambient reflected light, eliminating environmental glare and dramatically increasing the contrast ratio of the display. XTS is the first video entry monitor to employ this ground breaking innovation.

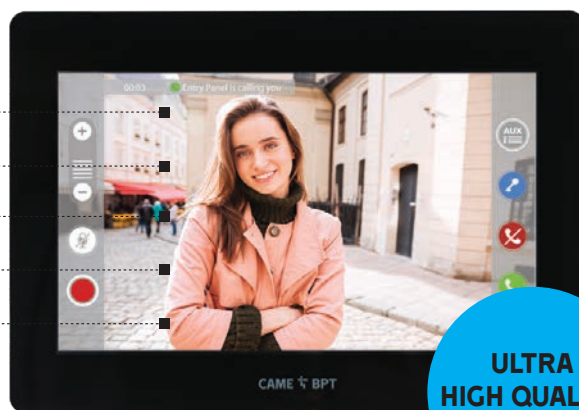

BONDED GLASS

INCREASED STRENGTH

IMPROVED DURABILITY

RESISTANCE TO FOGGING

EXTENDED TEMPERATURE RANGE AND EMI FILTERING

**ULTRA
HIGH QUALITY
DISPLAY**

CCTV INTEGRATION

Own an IP CCTV system and want to access live images easily and conveniently? Integrate them into XTS for full visual security at the touch of a screen.

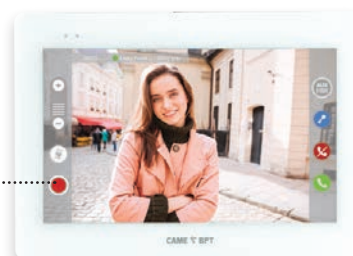

VIDEO VOICEMAIL

Expecting an important delivery and don't want to be disturbed? Simply enable the automated video voicemail and record an outgoing message. You can review your saved audio and video footage of the call later, at your convenience. Video messages are stored to the internal memory of the monitor and streamed directly to your smartphone via a push notification from the Video Entry app, meaning no video footage is stored in the cloud.

DISCRETE CALL RECORDING

Want added security and peace of mind? At the touch of the button, XTS can record audio and video from the call in progress.

AUTOMATIC DOOR OPENING

Having a party and don't want to keep having to get up to let everyone in? Activate the auto open feature on XTS and next time the call button is pressed the gates will open automatically (similar operation to a 'trades timer' function).

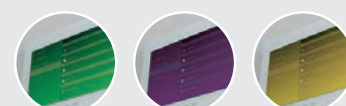

MISSED CALL NOTIFICATION

Need to know if someone tried to contact you? XTS will provide a missed call log showing the dates and times. Even when the monitor is in standby, an LED will illuminate to alert the user with a missed call notification when the screen is not active.

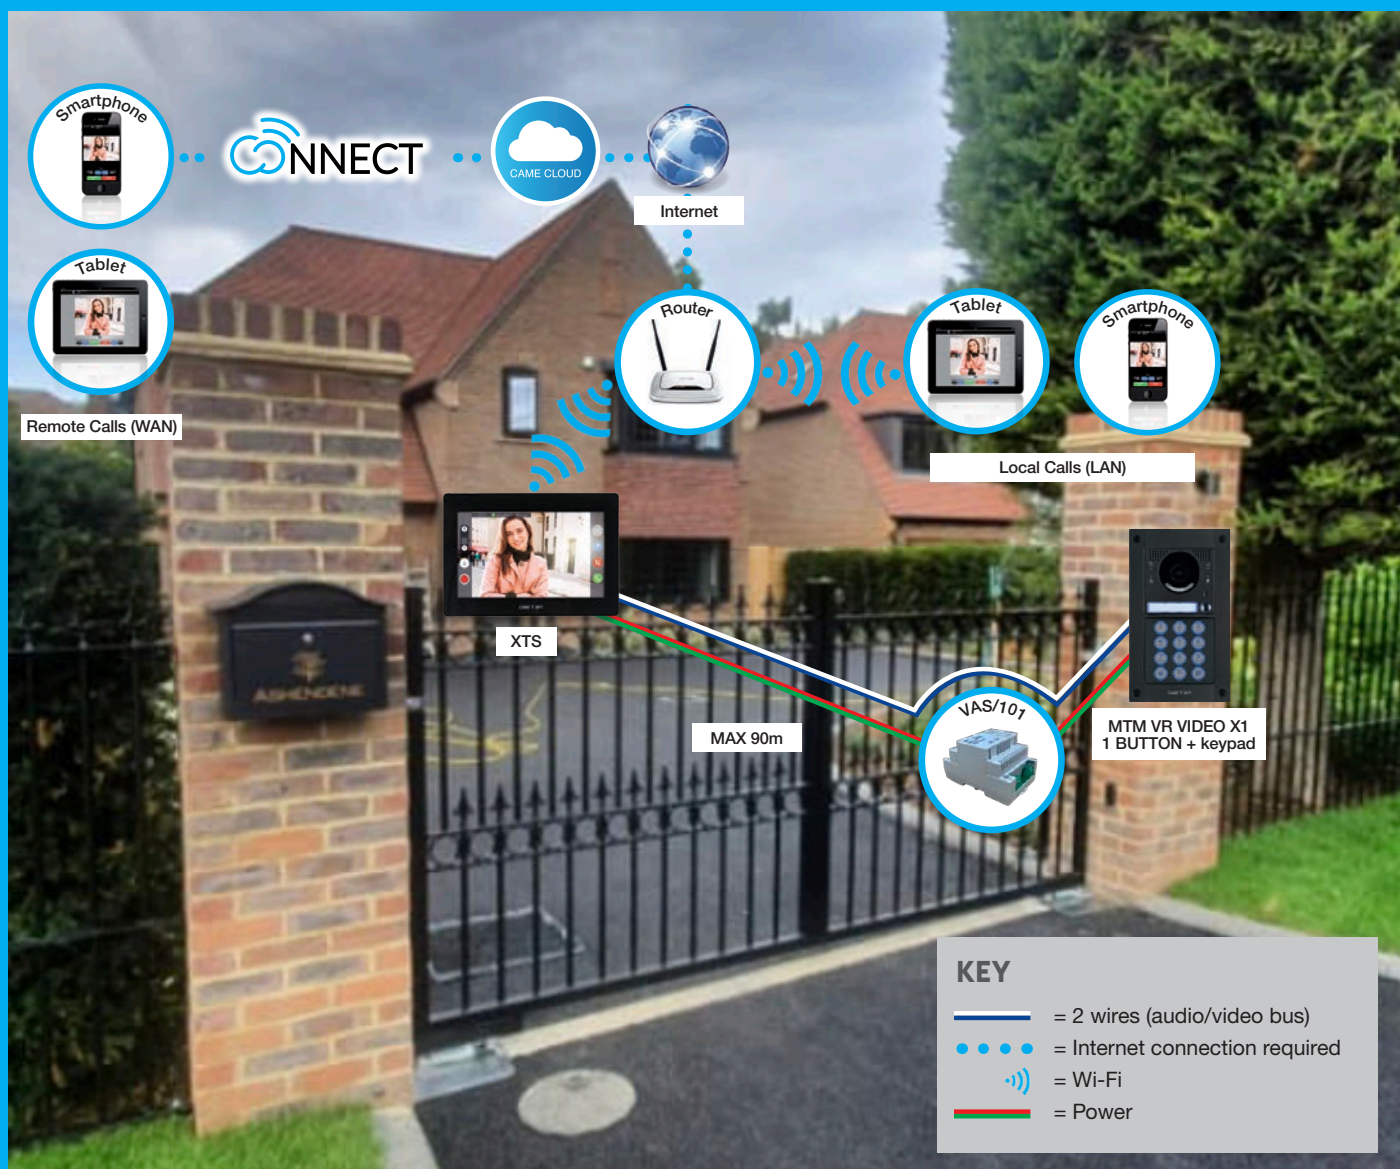

CHANGE YOUR COLOUR SCHEME

When using the tiled menu structure, different background colour schemes can be selected by the user to easily change the appearance of the XTS interface.

STANDARD INSTALLATION

ROUTER

The XTS monitor uses the on board WiFi card to wirelessly connect to the home router and the LAN to establish an Internet connection.

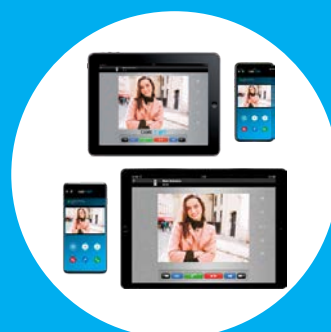

INTERNET

Using the property's internet connection allows a cloud connection using the network provider, meaning no additional costs are implied.

CAME CONNECT

CAME Cloud connectivity is established via 'CAME Connect' allowing the remote management of your entry panel via your smart device, guaranteeing maximum network security.

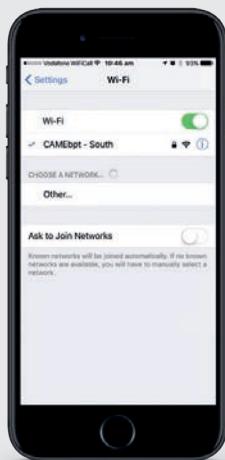

APP CONNECTIVITY

Video entry kits with WiFi calling support 4 simultaneous app connections per call. Each XTS X1 WiFi monitor is supplied with 4 app licenses included.

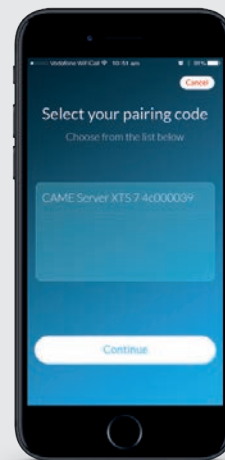

SUPER SIMPLE TO ACTIVATE VIDEO CALLING

1

Connect mobile device to apartment WiFi.

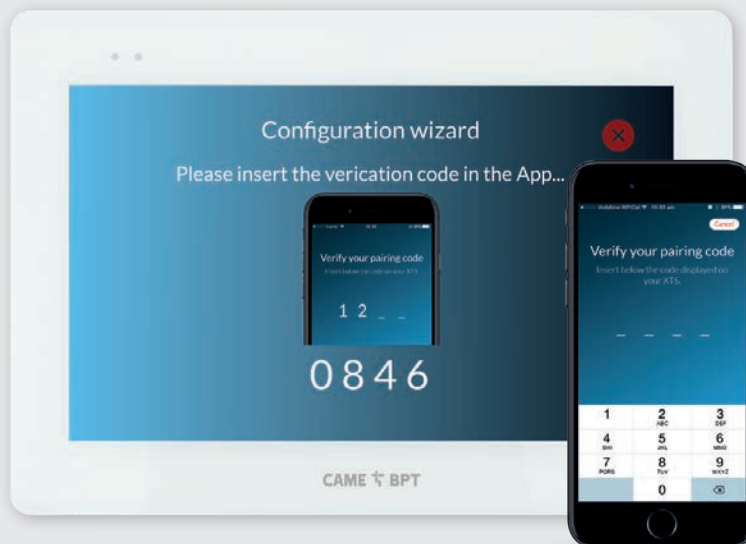

2

CAME BPT VideoEntry App.

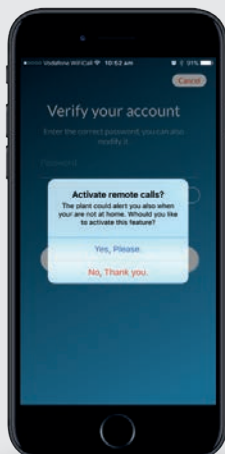

Open the CAME BPT VideoEntry App, select the XTS monitor.

3

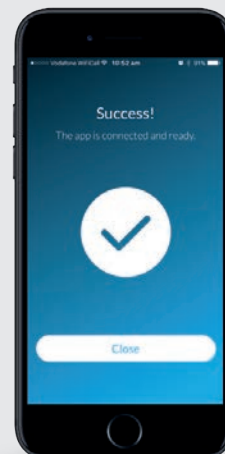

Enter the pairing code displayed on the XTS Monitor (Similar process to pairing your phone with an in car handsfree kit).

4

Confirm if remote calls via the cloud are required.

5

Connectivity complete.

The mobile device is now able to receive calls via the CAME BPT VideoEntry App.
