

# Art. 2321-2321/P Power supplies

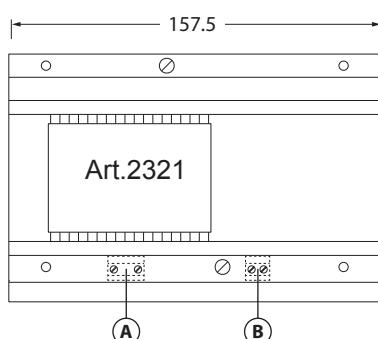

Fig. 1 Art. 2321

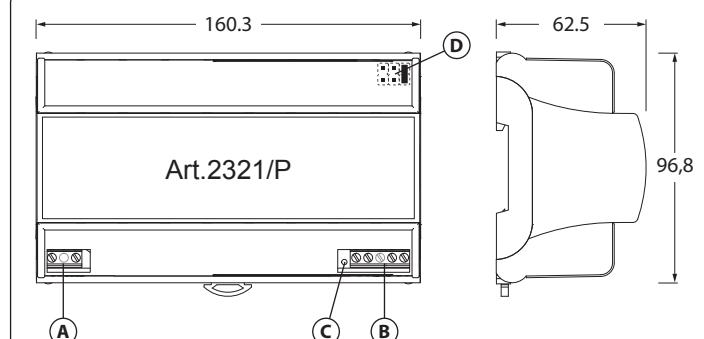

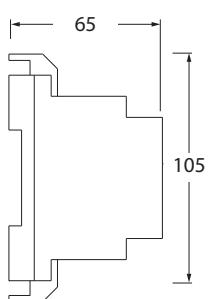

Fig. 2 Art. 2321/P (Rev.0.1)

## DESCRIPTION

Power supplies specifically designed for VX2300 digital system. The Art. 2321 can be used for systems with 1 entrance up to 50 users.

Art. 2321/P is for systems with more than 1 entrance (max 4 using Art. 2301) and up to 50 users.

For more than 50 users it is necessary to add another Art. 2321 to the BUS (to be placed in the middle of the BUS line, see installation diagram on **page 9**).

## MOUNTING INSTRUCTION

1. Remove the terminal side covers by unscrewing the retaining screws (**Fig. 3**);
2. Fix the power supply to a DIN rail (**Fig. 4**) or directly to the wall using two expansion type screws (**Fig. 5**);
3. Isolate the mains using the circuit breaker mentioned above then make the connections as shown on the installation diagrams (if provided);
4. Check all connections and secure the wires into the terminals;
5. When all connections are made replace and fix the terminal covers with the relevant screws (**Fig. 6**);
6. Restore the mains.

## LEGEND

- (A) Mains input
- (B) BUS terminals
- (C) Power on LED (only Art. 2321/P)
- (D) Voltage output adjustment jumper (only Art. 2321/P)

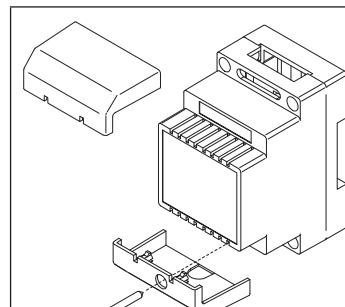

Fig. 3

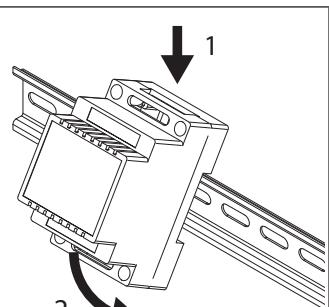

Fig. 4

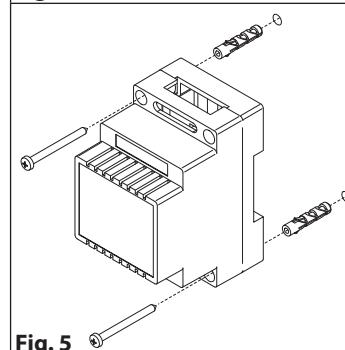

Fig. 5

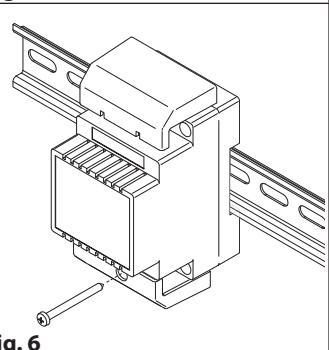

Fig. 6

### WARNING! CONNECTION TO MAINS

The system must be installed only by a qualified electrician and in accordance with national rules in force and installation diagrams (if provided).

In particular we recommend that:

- The system is connected to the mains through an all-pole circuit breaker which has a contact separation of at least 3mm in each pole and shall connect all poles simultaneously
  - The all-pole circuit breaker shall be placed for ease of access and the switch shall remain readily operable.
- Only for indoor use in dry places. Do not exceed the maximum power load indicated.

## Art. 2321-2321/P Power supplies

**⚠ NOTE: After each change on the programming of the door station, videophone or any other device connected to the system it is necessary to restart the system (power off then power on).**

## CONNECTION TERMINALS AND JUMPERS

<b>0</b>	Mains input
<b>~230V</b>	
<b>BUS +</b>	BUS terminals
<b>BUS -</b>	
<b>BUS +</b>	BUS terminals
<b>BUS -</b>	(only Art. 2321/P)
<b>V1</b>	Output voltage adjustment jumper (only Art. 2321/P).
<b>V2</b>	Set <b>V2</b> or <b>V3</b> in the presence of long distances or CAT.5 cables.
<b>V3</b>	Set <b>V3</b> when used with Art. 2301.

## TECHNICAL SPECIFICATIONS

<b>Housing:</b>	9 Module A Type DIN box	9 Module A Type DIN box
<b>Mounting:</b>	DIN bar or directly to the wall	DIN bar (provided)
<b>Controls:</b>		Output voltage (3 levels)
<b>Mains voltage:</b>	230 Vac ~ 50/60 Hz	230 Vac ~ 50/60 Hz
<b>Output voltage:</b>	32 Vdc 0.8 A	35 Vdc 1,5 A
<b>Working temperature:</b>	-20 +60 °C	-20 +60 °C

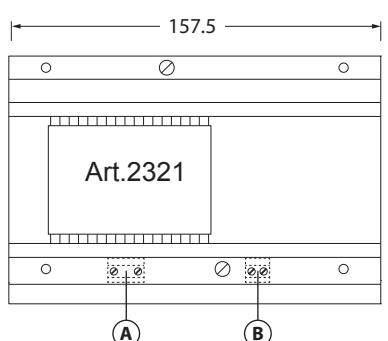

Fig. 1 Art. 2321

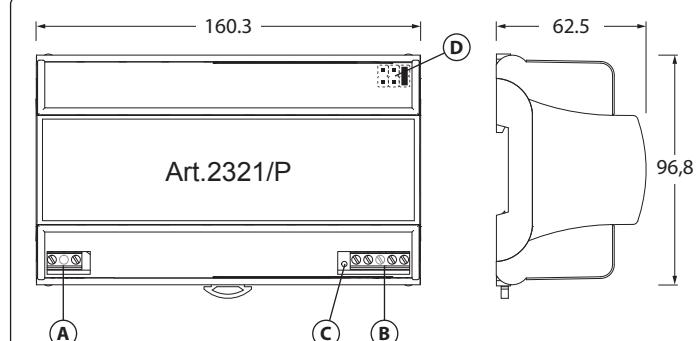

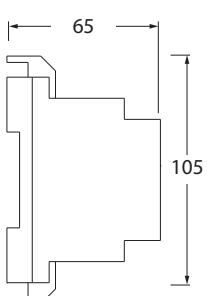

Fig. 2 Art. 2321/P (Rev.0.1)

**DESCRIZIONE**

Alimentatori specifici per i sistemi digitali VX2300.  
L'Art. 2321 viene utilizzato per sistemi ad 1 ingresso fino a 50 utenti.  
L'Art. 2321/P è per sistemi con più di un ingresso (massimo 4 utilizzando l'Art. 2301) e fino a 50 utenti.  
Oltre i 50 utenti è necessario aggiungere un altro Art. 2321 sul BUS (posizionare a metà linea BUS, vedi schema di installazione a pag. 9).

**ISTRUZIONI DI MONTAGGIO**

- Rimuovere i coperchi copri-morsetti svitando le relative viti e tirandoli verso l'alto (**Fig. 3**)
- Fissare su barra DIN (**Fig. 4**) o direttamente a parete utilizzando le viti ed i relativi tasselli ad espansione (**Fig. 5**)
- Togliere la tensione di rete tramite il dispositivo indicato in precedenza ed eseguire le connessioni come previsto dagli schemi proposti (se disponibili)
- Verificare che non vi siano errori di connessione e che i fili siano ben serrati nei morsetti
- Inserire a scatto i coperchi copri-morsetti e fissarli tramite le relative viti (**Fig. 6**)
- Eseguiti tutti i collegamenti, dare tensione all'impianto.

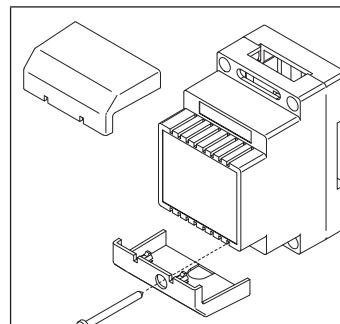

Fig. 3

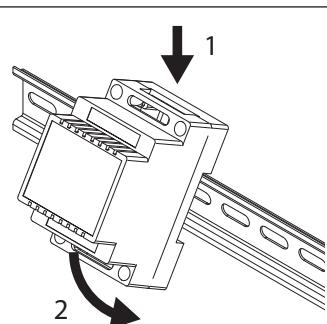

Fig. 4

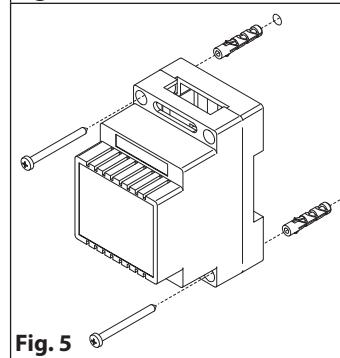

Fig. 5

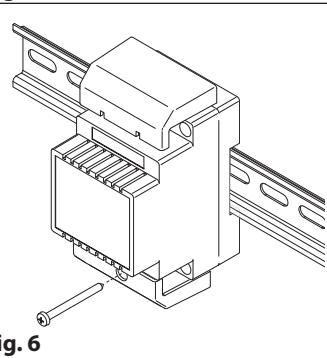

Fig. 6

**ATTENZIONE!****COLLEGAMENTO ALLA RETE ELETTRICA**

La realizzazione dell'impianto deve essere eseguita esclusivamente da un elettricista qualificato e nel rispetto delle vigenti normative nazionali e degli schemi di installazione proposti (se disponibili).

In particolare si raccomanda di:

- Collegare l'impianto alla rete elettrica tramite un dispositivo di interruzione omnipolare che abbia una distanza di separazione del contatto di almeno 3mm per ciascun polo e che sia in grado di disconnettere tutti i poli simultaneamente
- Il dispositivo di interruzione omnipolare deve essere posizionato in un luogo tale da consentirne un facile accesso in caso di necessità.

Solo per uso interno in ambienti asciutti. Non superare la potenza massima dichiarata.

**⚠ NOTA:** Dopo ogni cambiamento nella programmazione del posto esterno, del videocitofono o del relè, è necessario togliere l'alimentazione al sistema e ripristinarla affinché le variazioni vengano recepite dai rispettivi dispositivi.

# Art. 2321-2321/P Alimentations électriques

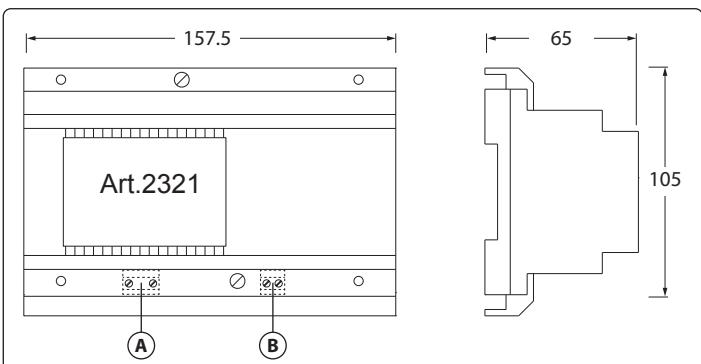

Fig. 1 Art. 2321

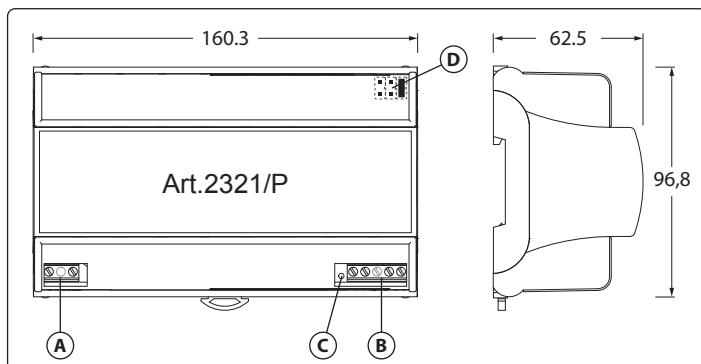

Fig. 2 Art. 2321/P (Rev.0.1)

## DESCRIPTION

Ces 2 alimentateurs sont conçus pour les systèmes numériques VX2300.

L'Art. 2321 est utilisé pour les systèmes à 1 entrée jusqu'à 50 utilisateurs.

L'Art. 2321/P concerne les systèmes comportant plus d'une entrée (maximum 4 en utilisant Art. 2301) et jusqu'à 50 utilisateurs.

Plus de 50 utilisateurs doivent ajouter un autre Art. 2321 sur le BUS (à placer au milieu de la ligne BUS, voir le schéma d'installation à la [page 9](#)).

## INSTRUCTIONS DE MONTAGE

1. Enlever les couvercles de couverture des bornes en desserrant les vis correspondantes et en les tirant vers le haut (**Fig. 3**)
2. Fixer sur le rail DIN (**Fig. 4**) ou directement au mur à l'aide des vis et des chevilles à expansion correspondantes (**Fig. 5**)
3. Débrancher la tension du secteur par le dispositif indiqué ci-dessus et effectuer les connexions comme prévu par les schémas proposés (si disponibles)
4. Vérifier qu'il n'y ait pas d'erreurs de connexion et que les fils soient bien serrés dans les bornes
5. Encincer les couvercles de couverture des bornes et les fixer à l'aide des vis correspondantes (**Fig. 6**)
6. Effectuer tous les raccordements, activer la tension à l'installation.

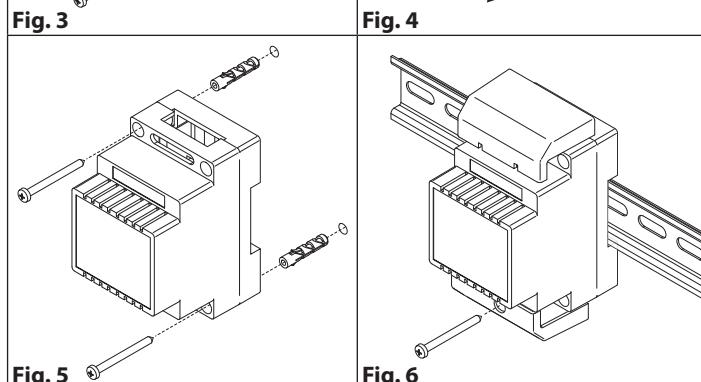

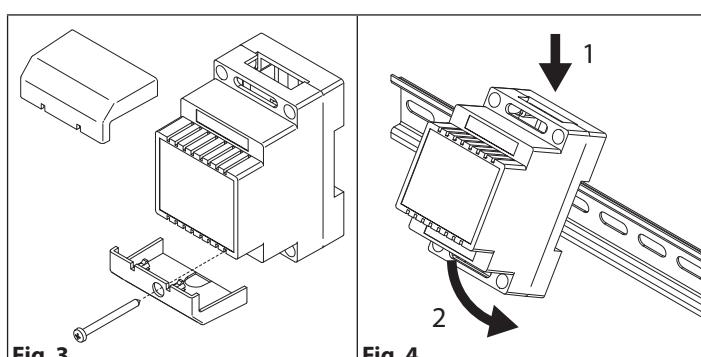

Fig. 5

Fig. 6

### ATTENTION !

#### RACCORDEMENT AU RÉSEAU ÉLECTRIQUE

L'installation doit être effectuée exclusivement par un électricien qualifié et en conformité avec les réglementations nationales en vigueur et les schémas d'installation proposés (s'ils sont disponibles).

Il est notamment recommandé de :

- Raccorder l'installation au réseau électrique au moyen d'un dispositif d'interruption omnipolaire qui a une distance de séparation du contact d'au-moins 3 mm pour chaque pôle et qu'il soit en mesure de déconnecter tous les pôles simultanément
- Le dispositif d'interruption omnipolaire doit être placé dans un lieu permettant un accès facile en cas de nécessité.

Uniquement pour une utilisation à l'intérieur dans des environnements secs. Ne pas dépasser la puissance maximale déclarée.

**⚠ REMARQUE :** Après chaque modification de la programmation du poste de rue, du vidéophone ou de tout autre appareil connecté au système, il est nécessaire de redémarrer le système (mise hors tension puis sous tension).

### BORNES DE CONNEXION ET CAVALIERS

<b>0</b>	Tension d'entrée du réseau
<b>~230V</b>

**Impianto Video con un numero di citofoni/videocitofoni maggiore di 50 (99 dispositivi max)**

**Video system with a number of intercoms/videophones greater than 50 (99 devices max)**

**NOTE:**

- Essendo l'Art.319 l'ultimo distributore video in ordine di connessione, impostare il "Bus Line Jumper" dell'Art.319 in posizione "Close".

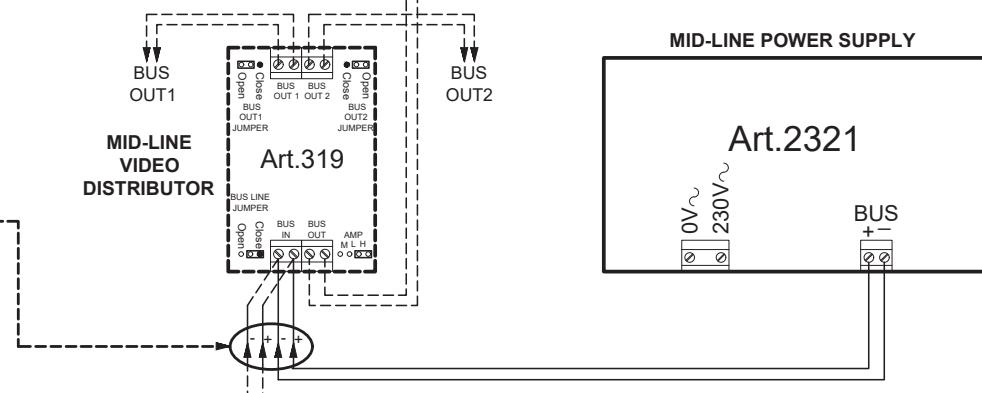

- The Art.319 is the last video distributor in order of connection. Set the "Bus Line Jumper" of Art.319 to "Close" position.

**NOTE:**

- Se il numero di dispositivi è maggiore di 50, è necessario aggiungere un ulteriore alimentatore Art.2321 a metà linea. Utilizzare un multimetro per rispettare le polarità tra "BUS" dell'Art.2321 e "BUS IN" dell'Art.319.

- If there are more than 50 devices, it's necessary to add an extra Art.2321 power supply in the middle of the line. Use a multimeter to respect the polarities between "BUS" of Art.2321 and "BUS IN" of Art.319.

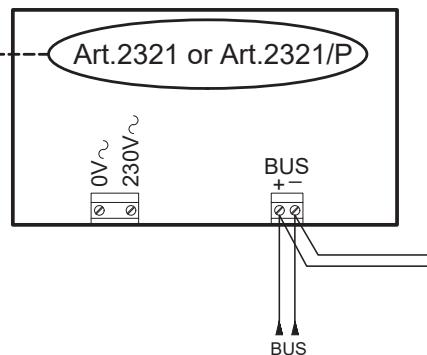

**NOTE:**

Extension N.1  
Address ID:49

Extension N.1  
Address ID:50

**NOTE:**

- Art.2321 se è presente un solo ingresso. Art.2321/P se sono presenti più ingressi (max 4 ingressi usando l'Art.2301).
- Art.2321 if there is only one entrance. Art.2321/P if there are more than one entrance (max 4 entrances using Art.2301).

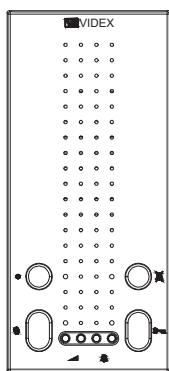

**NOTE:**

- Per lunghe distanze è consigliabile utilizzare un distributore video attivo (Art.319) al posto del 318S, questo permette di regolare il segnale video con 3 livelli di amplificazione (L,M,H).

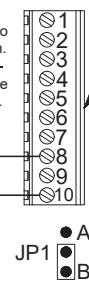

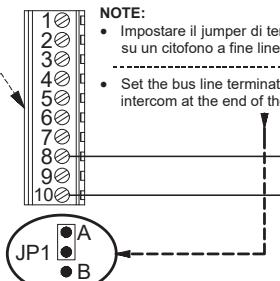

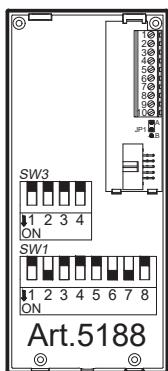

- For long distances it is advisable to use an active video distributor (Art.319) instead of Art.318S, which allows you to adjust the video signal with 3 levels of amplification (L,M,H).

### NOTE:

- Art.2321 se è presente un solo ingresso. Art.2321/P se sono presenti più ingressi (max 4 ingressi). Consultare il manuale del posto esterno per ulteriori schemi elettrici.
- Art.2321 if there is only one entrance. Art.2321/P if there are more than one entrance (max 4 entrances). Consult the manual of the outdoor station for additional wiring diagrams.

**ENG DISPOSAL**

In accordance with the Legislative Decree no. 49 of 14 March 2014 "Implementation of the Directive 2012/19/EU on waste electrical and electronic equipment (WEEE)".

The crossed-out bin symbol on the equipment or on the packaging indicates that when the product reaches the end of its lifetime, it must be collected separately from mixed municipal waste. The user must, therefore, dispose of the equipment at the end of its lifetime in the suitable waste collection centres or bring it to the retailer during the purchase of a new equipment of equivalent type at the ratio of one-to-one. Furthermore, the user is allowed to dispose of the WEEEs of very small size (domestic appliances without any external dimension exceeding 25 cm (9.84 inches) for free to the retailers, without any purchase obligation. The correct waste disposal of the WEEEs contributes to their reuse, recycling and recovery and avoids potential negative effects on the environment and human health due to the possible presence of dangerous substances within them.

**ITA SMALTIMENTO**

Ai sensi del Decreto Legislativo 14 marzo 2014, n° 49 "Attuazione della direttiva 2012/19/UE sui rifiuti di apparecchiature elettriche ed elettroniche (RAEE)".

Il simbolo del cassetto barrato riportato sull'apparecchiatura o sulla sua confezione indica che il prodotto alla fine della propria vita utile deve essere raccolto separatamente dagli altri rifiuti urbani misti. L'utente dovrà, pertanto, conferire l'apparecchiatura giunta a fine vita presso gli idonei centri di raccolta differenziata oppure riconsegnarla al rivenditore al momento dell'acquisto di una nuova apparecchiatura di tipo equivalente, in ragione di uno a uno. L'utente ha, inoltre, la possibilità di conferire gratuitamente presso i distributori, senza alcun obbligo di acquisto, per i RAEE di piccolissime dimensioni (per le apparecchiature di tipo domestico con nessuna dimensione esterna superiore a 25 cm).

L'adeguata raccolta differenziata dei RAEE contribuisce al loro riutilizzo, riciclaggio e recupero ed evita potenziali effetti negativi sull'ambiente e sulla salute umana dovuti alla eventuale presenza di sostanze pericolose al loro interno.

**FRA ÉLIMINATION**

Conformément au décret législatif n ° 49 du 14 mars 2014 relatif à l' « Application de la directive 2012/19 / UE relative aux déchets d'équipements électriques et électroniques (DEEE) ».

Le symbole de la poubelle barrée sur l'équipement ou sur son emballage indique que le produit en fin de vie utile doit être collecté séparément des autres déchets municipaux en mélange. L'utilisateur doit donc remettre l'équipement en fin de vie aux centres de collecte appropriés ou le restituer au revendeur lors de l'achat d'un nouveau type d'équipement équivalent, dans le rapport de un à un. De plus, l'utilisateur a la possibilité de conférer gratuitement aux distributeurs, sans aucune obligation d'achat, de très petits DEEE (pour les appareils ménagers sans dimensions extérieures supérieures à 25 cm). La collecte séparée adéquate des DEEE contribue à leur réutilisation, leur recyclage et leur valorisation et évite les éventuels effets négatifs sur l'environnement et la santé humaine en raison de la présence possible de substances dangereuses dans ceux-ci.

**SPA ELIMINACIÓN**

De conformidad con el Decreto legislativo n. 49 de 14 de marzo 2014 "Aplicación de la Directiva 2012/19/UE relativa a residuos de aparatos eléctricos y electrónicos (RAEE)".

El símbolo del contenedor tachado indicado sobre los aparatos o sobre los embalajes señala que el producto al final de su vida útil debe ser recogido separadamente de otros residuos municipales mezclados. Por tanto, el usuario deberá conferir los aparatos al final de su vida útil en los apropiados centros de recogida selectiva o devolverlos al vendedor al momento de la compra de nuevos aparatos equivalentes, en una relación de uno a uno. Además, el usuario tiene la posibilidad de entregar sin cargo a los distribuidores, sin ninguna obligación de compra, los RAEEs muy pequeños (para electrodomésticos sin dimensiones externas superiores a 25 cm).

La recogida selectiva apropiada de los RAEEs contribuye a su reutilización, reciclaje y valorización y evita potenciales impactos negativos sobre el medio ambiente y la salud humana debidos a la posible presencia de substancias peligrosas dentro de ellos.

**NLD VERWIJDERING**

In overeenstemming met het Wetsbesluit nr. 49 van 14 maart 2015 "Implementatie van de Richtlijn 2012/19/EU inzake afgedankte elektrische en elektronische apparaten (AEEA)".

Het doorgekruiste vuilnisbaksymbool op het apparaat of de verpakking geeft aan dat het product aan het einde van zijn levensduur niet samen met het gewone huisvuil weggegooid mag worden. De gebruiker moet het apparaat aan het einde van zijn levensduur inleveren bij een gepast inzamelpunt of de winkel waar hij een nieuw apparaat van een gelijksoortig type zal kopen. De gebruiker kan tevens AEEA's van een zeer klein formaat (huishoudapparaten met een buitenafmeting kleiner dan 25 cm (9,84 inch) gratis en zonder enige aankoopverplichting bij handelaars inleveren. Een juiste verwijdering van AEEA's draagt bij tot hergebruik, recycling en terugwinning, en voorkomt potentieel negatieve effecten op het milieu en de menselijke gezondheid door de mogelijke aanwezigheid van gevaarlijke stoffen.

**POR ELIMINAÇÃO**

De acordo com o Decreto Legislativo n.º 49 de 14 de março de 2014 "Implementação da Diretiva 2012/19/UE relativa aos resíduos de equipamentos elétricos e eletrônicos (REEE)".

O símbolo do caixote do lixo riscado no equipamento ou na embalagem indica que quando o produto atinge o fim da sua vida útil, deve ser recolhido separadamente dos resíduos urbanos mistos. O utilizador deve, portanto, eliminar o equipamento no final da sua vida útil nos centros de recolha de resíduos adequados ou levá-lo ao vendedor durante a compra de um novo equipamento de tipo equivalente, na proporção de um para um. Além disso, o utilizador pode eliminar gratuitamente os REEE de dimensões muito reduzidas aos vendedores, sem qualquer obrigação de compra.(só aparelhos domésticos sem qualquer dimensão externa que exceda 25 cm, ou seja 9,84 polegadas). A correta eliminação dos REEE contribui para a sua reutilização, reciclagem e recuperação e evita potenciais efeitos negativos sobre o ambiente e a saúde humana devido à possível presença de substâncias perigosas no seu interior.
